**Citizens revolting Against Pollution
2721 Pikake Street
San diego Ca. 92154**

Mr. Daniel Borunda:

It is my pleasure to write a comment in regards to the International Boundary Water Commission direction to go to secondary treatment in San Diego county. This will be a brief letter because so much words have been said on what to do in regards to secondary treatment and enough is enough!

**Alternative 4: Public Law 106-457 is the best alternative and citizens who live in southbay and who has a neighbor as Mexico in more or less in their back yard and who have fought for years to make this border pollution free cannot wait to have this project done.
Again thank you for letting us make a comment!!**

Thank You

David Gorn
